

Python Machine Learning (CSCI 425)
Student Showcase (Final Project) Rubric

Project Title: **INTRUSION DETECTION WITH MACHINE LEARNING**
Cody Stoffel, Patrick Murphy

Instructions:

1. For each requirement, use 0.0 - 5.0 scale in the Score column (0 - Fail, 1 - Needs improvement, 2 - Poor, 3 - Fair, 4 - Good, 5 is Excellent)

what's attack detected?

Criteria	Score (1-5)
1. Problem Definition & Motivation	5
a. Clearly defined problem statement.	5
b. Understanding of the domain and context	4
2. Data Acquisition & Preprocessing	5
a. Data cleaning and handling missing values	5
b. Feature engineering and selection	4
c. Data normalization and scaling	4
3. Model Selection, Evaluation & Justification	5
a. Selection of appropriate ML algorithms	4
b. Model training and tuning	5
c. Evaluation metrics and performance analysis	5
4. Creativity and Innovation	5
a. Novelty and originality of approach	4
b. Exploration of advanced techniques (Deep Learning, e.g.)	3
5. Presentation	5
a. Quality of visualizations and insights	4
b. Ability to communicate results effectively	5
Final Score	52/60

General Feedback:

Interesting Demo app! Instead of just entering values, it literally simulates logging
